

DAFA Universal Tip Protector

Visibility and protection during blade transportation

DAFA Universal Tip Protector

Avoid expensive repairs and delays when installing wind turbines. DAFA Universal Tip Protector is a one-size-fits-all solution designed to protect the blade tip during transportation and handling of wind turbine blades. DAFA Universal Tip Protector ensures optimum visibility during transport and also protects against injury when people make their way around the blades.

DAFA Universal Tip Protector is a unique one-size-fits-all solution designed to protect the blade tip during transportation, storage and installation of wind turbine blades.

DAFA Universal Tip Protector is available in different sizes

Type C30-MS is delivered with an integrated elastic band
 Type C30 is delivered with one separate lashing strap
 Type L20 is delivered with two separate straps

Advantages

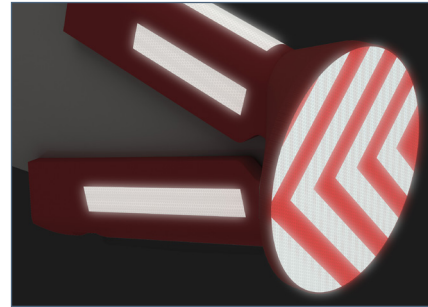

- Prevents costly delays and repairs
- Protects against injury during storage and installation of the blade
- Optimal visibility and safety during transport, at night and during the day
- Adapts to any type of blade tip
- Exceptionally sturdy, strong and resistant foam
- Easy to mount, no tool costs
- Competitive pricing

DAFA Universal Tip Protector

Adapts to all blade types

DAFA Universal Tip Protector is specially designed to adapt to all types of blade tips, whether they are rounded or sharp. The special open design assures that the tip protector settles gently around the blade.

Optimal visibility for greater safety

Thanks to its signal color and powerful reflective strips, DAFA Universal Tip Protector provides optimum visibility for the blade during transportation - at night and during the day.

Various solutions to fit your installation need

Different mounting options, so you can choose the one that fits your specific requirements.

DAFA Tip Protector C30-MS

NEW

DAFA Mounting Spot

Easy, safe, and stable mounting of the Tip Protector both during the storage and transportation of blades. Attach lighting equipment to the solution, such as rotating beacons, for extra visibility during transportation.

- Intended for blade transportation and storage
- Protection against overtightening the components
- Mounted without the use of straps or tape
- Attachment of lighting equipment onto the tip of the blade
- No need for tools during mounting

DAFA Tip Protector C30/L20

DAFA Tape

Simple and cost-effective method for mounting the DAFA Tip Protector while storing blades. The tape can also be used solely during transportation or in combination with the DAFA Strap Fix.

- Intended for blade transportation and storage
- No need for tools during mounting

DAFA Strap Fix

Used for attaching lighting equipment, such as rotating beacons, during blade transportation. The solution fixes the strap in place and reduces the load from the strap, so blade edges are protected from overtightening.

- Attachment of lighting equipment onto the tip of the blade
- Brackets on both edges of the blade keep the strap in place
- Intended for blade transportation
- No need for tools during mounting
